PROFESSIONAL SUMMARY

Computer Science and Engineering student pursuing an Integrated M.Tech at VIT-AP University with a CGPA of 7.94/10. Dedicated to frontend engineering, interactive web applications, software systems, and thoughtful digital experiences. Skilled in Java, Python, C/C++, JavaScript, React, Tailwind CSS, and databases. Completed a Frontend Engineering internship at FlyRank AI and engineered scalable web applications including ClinicFlow, an end-to-end clinic management platform.

EDUCATION

VIT-AP University *September 2024 - Present*
Integrated M.Tech in Computer Science and Engineering | CGPA: 7.94 / 10.0

St. Joseph's Higher Secondary School *August 2022 - March 2024*
Higher Secondary Education (Bio-Maths / Science)

INTERNSHIP EXPERIENCE

FlyRank AI - Frontend Engineering Intern *July 2026 - September 2026*
- Gained practical exposure to modern frontend engineering workflows and production web interface architectures.
- Translated functional and design specifications into modular, responsive interface components, optimizing UI usability.
- Collaborated across development cycles, participating in code reviews, testing, and continuous frontend enhancements.

KEY PROJECTS

ClinicFlow - Comprehensive Clinic Management Platform *clinicflow-platform.vercel.app*
- Architected an end-to-end SaaS healthcare management platform unifying electronic records, appointments, and billing.
- Designed role-based permissions separating Super Admin, Clinic Admin, Doctor, and Receptionist workflows.
- Tech Stack: React, TypeScript, Tailwind CSS, REST APIs, PostgreSQL.

University Event Management System *github.com/joetomjames123*
- Built a web-based portal facilitating institutional event registrations, attendee management, and schedule publishing.
- Automated participant tracking and ticket issuance, minimizing organizational overhead for university clubs.
- Tech Stack: JavaScript, HTML5/CSS3, Relational Database Management System.

Hardware and Engineering Prototypes
- Waste-Collecting Boat: Prototyped a dual-hull aquatic mechanism for surface pollutant collection in water bodies.
- Line-Following Autonomous Robot: Built an IR sensor-driven microcontrolled rover programmed for high-precision path tracing.

TECHNICAL SKILLS

Programming Languages:	Java, Python, C, C++, JavaScript, TypeScript
Frontend and Web UI:	React, HTML5, CSS3, Tailwind CSS, Responsive Design
Databases and Backend:	MySQL, PostgreSQL, NoSQL databases, RESTful APIs
Developer Tools and OS:	Git, GitHub, Visual Studio Code, Linux, Windows
Core Computer Science:	OOP, Data Structures and Algorithms, DBMS, Operating Systems, Software Engineering

VERIFIED CERTIFICATIONS

- Front-end AI Engineering and AI Fluency - FlyRank AI
- Hedera Certified Developer Associate (HCDA) and Hedera Certified Foundation (HCF) - IDS / BBN
- Introduction to Generative AI (Google Cloud) and Prompt Engineering with GitHub Copilot (Microsoft) - Simplilearn
- DBMS Course: Master Fundamentals and Advanced Concepts - Scaler Topics
- MATLAB Onramp - MathWorks | Make to Monetize - VIT-AP University
