PROFESSIONAL SUMMARY

Computer Science and Engineering student pursuing an Integrated M.Tech at VIT-AP University, with a CGPA of 7.94/10. Strong interest in frontend engineering, software development, and practical technology solutions. Skilled in Java, Python, C/C++, web technologies, and databases. Completed a Frontend Engineering internship at FlyRank AI and developed academic and personal projects, including ClinicFlow, a clinic management platform. Enjoys solving problems, learning new tools, and building clear, user-friendly digital experiences.

INTERNSHIP EXPERIENCE

FlyRank AI — Frontend Engineering Intern | Online

- Gained practical exposure to frontend engineering workflows and the development of user-facing web interfaces.
- Worked on translating requirements into interface components and improving usability and presentation.
- Built familiarity with collaborative development practices and iterative improvement of frontend work.

PROJECTS

ClinicFlow — Clinic Management Platform

- Designed a clinic management platform concept to streamline patient records, appointments, billing, and prescriptions.
- Outlined role-based access for Super Admin, Clinic Admin, doctors, and receptionists to separate responsibilities and protect access.
- Focused on a clean, responsive SaaS interface suitable for different clinic types.
- Technologies: React, JavaScript/TypeScript, Tailwind CSS, Spring Boot, and PostgreSQL (retain only those actually used).

University Event Management System

- Developed a web-based system concept for event registration, participant management, and event scheduling.
- Focused on making event information and registration tasks easier to organize.

Waste-Collecting Boat

- Worked on a prototype concept for collecting floating waste from water bodies.
- Explored practical waste-handling ideas to support cleaner waterways and environmental sustainability.

Line-Following Robot

- Designed a sensor-based robot concept that follows a predefined path using IR sensors and motor control.
- Applied basic robotics and automation concepts to support accurate movement.

EDUCATION

Integrated M.Tech in Computer Science and Engineering | VIT-AP University

September 2024 – Present | **CGPA: 7.94/10**

Higher Secondary Education | St. Joseph's Higher Secondary School

August 2022 – March 2024

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, C++
- **Web Development:** HTML, CSS, JavaScript, React
- **Databases:** MySQL, PostgreSQL, NoSQL
- **Developer Tools:** Git, GitHub, Visual Studio Code
- **Core Concepts:** Object-Oriented Programming, Data Structures and Algorithms, DBMS, Operating Systems, Software Engineering

- **Certifications:** Introduction to Generative AI (Google Cloud & Simplilearn SkillUp); Introduction to Prompt Engineering with GitHub Copilot (Microsoft & Simplilearn SkillUp)
